Design Advice & Final Guidance

Q971.

What is the most common mistake people make when furnishing a living room?

The most common mistakes are choosing furniture that is too small for the room, placing all furniture against the walls, and neglecting adequate and layered lighting.

Q972.

How do I create a sense of luxury on a limited budget?

Focus budget on a few statement pieces, invest in good quality lighting, use large mirrors to amplify light, and layer inexpensive textiles in rich textures for a luxurious feel.

Q973.

What is the easiest way to update a room without buying new furniture?

Repainting walls, changing cushion covers and throws, adding a new rug, rearranging existing furniture, and introducing new artwork are all high-impact, low-cost updates.

Q974.

How do I choose the right ceiling height for pendant lights in a kitchen?

Pendants over a kitchen island should hang with their base approximately 75 to 90 cm above the worktop surface for practical illumination without obstruction.

Q975.

What is the best way to create a luxurious bedroom for under a modest budget?

Focus on a quality headboard, sumptuous bedding, layered lighting, and a fresh coat of paint in a rich, calming tone. Good styling makes an enormous difference at minimal cost.

Q976.

How do I make a basement feel less dark?

Use pale reflective colours, maximise artificial light with multiple sources, incorporate mirrors, choose furniture with visible legs, and add warm textiles to counteract the feeling of being underground.

Q977.

What is the most versatile type of dining chair to own?

A simple, well-proportioned upholstered chair in a neutral colour on a wooden or metal frame is the most versatile choice, working with a wide range of table styles and dining rooms.

Q978.

How do I decide between an open and a closed shelving unit?

Open shelving suits curated displays and easy access but requires tidiness. Closed cabinets conceal clutter and are easier to maintain. A combination of both often provides the best of each.

Q979.

What is the best way to plan a gallery wall without putting holes in the wall?

Use adhesive strips rated for the frame weight, paper templates to plan the arrangement before hanging, and a laser level for alignment. Always test the adhesive type on a small patch first.

Q980.

How do I choose a sofa for a room with lots of natural light?

In a bright room, bolder and richer upholstery colours show their true beauty. Velvet, deeply saturated fabric, and contrast cushions all work particularly well in a well-lit space.

Q984.

How do I choose a paint colour I will not regret?
